

Vision, Mission and Values Statement

Our Vision

To make a meaningful and lasting transformation to the lives of our students through Equine Facilitated Education and Therapy (EFET).

Our Mission Statement

To deliver Equine Facilitated Education and Therapy through working with horses in an environment where students can thrive; maximising both physical and emotional health and wellbeing in an environment where they feel safe, happy, and confident to learn. We foster life skills, communication, and self-reliance to enable students to have an active voice and increased independence on their journey into adulthood.

Our Values

We want everyone to thrive.

Trust

Stakeholders entrust us to support students on their journey to increased independence.

We provide the opportunity to build relationships and develop trust through collaboratively working with horses.

In Equine Facilitated Education and Therapy, trust operates on multiple levels:

- Trust in the horse
- Trust in the staff
- Trust in the process

Holistic

Holistic equine therapy foundation is in principles of integration, respect for biological and emotional systems, and experiential learning, to achieve a multi-dimensional approach that benefits both horses and humans, promoting overall health, resilience and personal growth.

Resilience

Working with horses fosters resilience by encouraging students to navigate setbacks, regulate emotions, and adapt their approach. Horses provide honest, non-judgmental feedback, offering a unique opportunity to develop perseverance and confidence in a supportive environment.

Integrity

Horses respond not to what we say, but to what we do, congruence— making them powerful teachers of authenticity, honesty and consistency. Accountability to Trustees and regulation by Ofsted, CQC, BHS and Local Authorities ensure we maintain professional standards.

Vision

We have vision for our students, staff and the college by:

- Future proofing the organisation
- Empowering students to create a vision of their own futures
- Encouraging career progression for staff
- Creating a culture of continuous improvement

Empowerment

Our horses empower our students to feel safe to learn, form friendships, build in confidence and work towards their own goals for their future.
